Dan Lowry gave us a Ron Sherer to talk about fire services for the Canby Fire District.

Ron shared with us how by changing a few areas of rural lands in the Cal Pines Fire District and the Canby Fire District, he was able to reduce cost and change fire ratings so that more home owners would reduce their own insurance cost.

Ron has been able to fund his stations by contracting out with Federal and state Agencies on wildland fires. Ron has also been able to apply for Federal Grants to purchase new equipment and improve the services provided. Below are some basic concepts in fire protection for your home. These are for rural homes that do not have surrounding homes or close proximity to other residences.

- Have a Class "A" Roof
- No debris in gutters
- Non-combustible gutters
- All areas under porches enclosed.
- No plastic or vinyl railings on decks
- Double pain windows or tempered windows.
- 1 3/4" thick doors
- No Wood or shake

Wall coverings.

- Boxed eaves
- No trees within 10 feet of chimneys or wood stove pipes.
- Spark resister required
- Non-combustible insulation in attic.

While these are just general guidelines. Every home owner should asked their local fire protection district on all local laws and what each homeowner is required to do.

For more information from Cal Fire visit:
